## LABELS

One of the most important elements of advertising is product appearance. The consumer, deciding to purchase a particular product, is usually guided by emotions that are triggered by appropriately selected colours for the product. Our company has rich experience in both designing and printing a wide variety of labels for many manufacturing industries.

We offer self-adhesive labels on paper or foil, matt or glossy, digital and offset printed.

CATALOGUE

Industry catalogues are an important element in building the image of the company and they mostly include descriptions of products or services. Our company has on offer of printing of catalogues in various formats and, depending on the volume of pages catalogues can be sewn or glued. Catalogues as stitched booklets are in sizes from DL to A4 in the volume of pages from 8 to 60, and catalogues with glued spine from 48 pages to 256. Thick paper (matt or gloss) is used to print catalogues in weight from 130 to 300 g.

## STICKER

Stickers are an excellent form of advertising. Whether they are stickers for children or logos handed out at jamborees and fairs, they all serve their purpose by constant contact with the customer.

Stickers also are used in technical processes - as warning or describing stickers. Our stickers, thanks to the use of OPOS cutting become unique in their appearance and therefore stand out among other stickers.

## BOXES

Packaging boxes are essential containers used to protect, store, transport, and present products across various industries. They play a vital role in ensuring product safety while also serving as a powerful marketing tool that enhances brand visibility and customer appeal. Modern packaging boxes are available in a wide range of materials, sizes, shapes, and designs to meet the specific requirements of different products. From food and cosmetics to pharmaceuticals, electronics, and consumer goods, packaging boxes help maintain product quality and create a positive first impression.
